**In the last 10 weeks, Arizona has checked the voter registration credentials with the Social Security Administration (SSA) on 673,560 applicants.**

**This is a massive volume considering most States including Arizona typically process around 2,500 a month.** They've processed more identities in the last 2 months than they've done in the last 9 years combined. Is someone scrubbing a database, or auditing "Federal Only" voters?

During "new voter registration" States are to verify the driver's license number against their own MVD database. Only in situations where no driver's license can be provided should the State check their identity through the Help America Vote Verification ([HAVV](#)) interface provided by the SSA. The 43 States that participate provide the last 4 of the SS#, the applicant's name, and DOB. The interface responds if a match was, or was not found, if they are deceased, and so on. This entire HAVV Excel dataset can [be downloaded here](#) from the SSA.

AZ New Voter Registration Verification w/ Social Security Administration												
When NO Drivers License Can Be Produced - State Submits Last 4 digits of SSN, Name, and DOB												
DATE	STATE	TOTAL TRANSACTIONS	UN	TOTAL	TOTAL MATCHES	SINGLE	SINGLE	MULTIPLE	MULTIPLE	MULTIPLE	% NON MATCH

7/3/21	Arizona	33,103	0	20,249	12,854	12,712	142	0	0	0	61%	
<b>TOTALS</b>		<b>673,560</b>	<b>0</b>	<b>393,017</b>	<b>280,543</b>	<b>277,907</b>	<b>2,634</b>	<b>0</b>	<b>0</b>	<b>2</b>		

58% - Did Not Match Soc Sec Records

**“No Match” was found on 58% of the voters submitted by Arizona over the last 10 weeks.**

**For A Limited Time: Get A Lifetime License For Microsoft Office Professional Plus 2019 For 82% Off . . .**

**A whopping 393,017 did not have a match out of the 673,560.** In fact, Arizona weekly processing has one of the highest Non Match percentages in the country, typically between 50%-65%. In most other States this ratio is from 15%-25%.

In the first week of July, Arizona jumped from processing 500-600 a week, to a massive 70,000 a week. This volume stopped on September 10th and is now back down to a few hundred. Starting in February both **Texas** and **Kansas** were also processing large volumes each week, between 30,000 to 55,000. This also stopped and went back to normal volumes in June. These are checks on older voter registration applications because this volume far exceeds new voter applications.

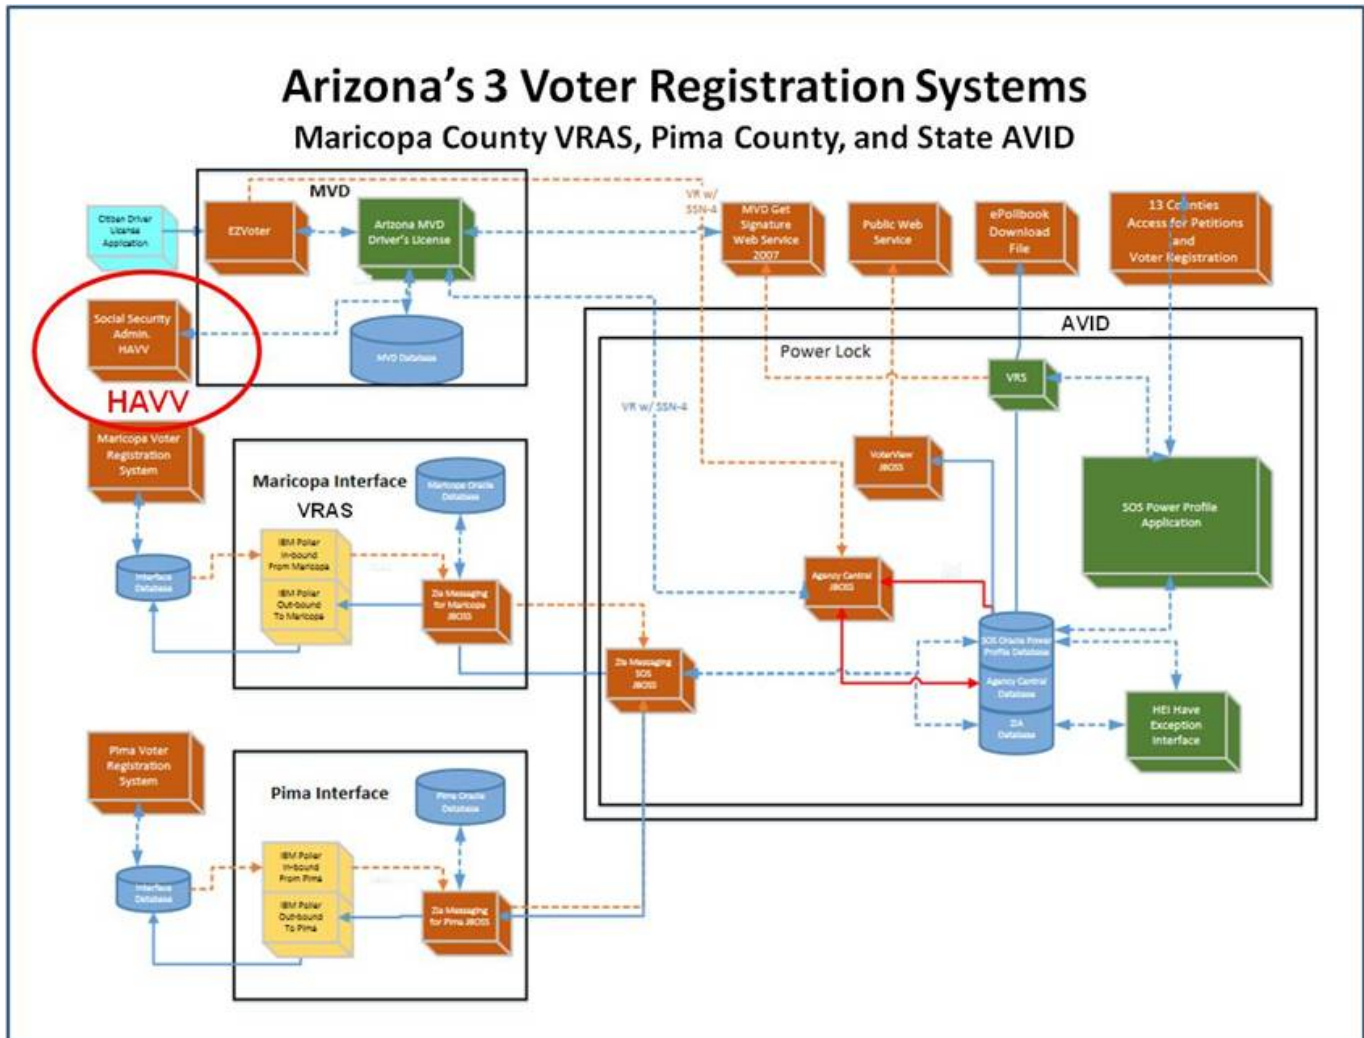

So what is going on here?

The image below shows the only 3 voter registrations systems in Arizona and many of the interfaces. This includes Maricopa's VRAS system, the Pima

County system, and the State-based system called AVID used by all other counties. The HAVV Interface processes data through the MVD. Because of this, it's unclear which of these 3 voter registration systems, or possibly a commercial service, is pushing this massive number of ID verification requests to the SSA.

This appears it's possible this may have been related to the audit investigation.

Below are the weekly transactions for the past two years of voter identity processing by Arizona. Rarely do they ever exceed a few hundred requests a week, until July of 2021.

DATE	STATE	TOTAL	UN	TOTAL	TOTAL	SINGLE	SINGLE	MULTIPLE	MULTIPLE	MULTIPLE

The democrats have been salting the voter roles for decades. If it is this bad in what has been a solidly red state, imagine how bad it is across the rest of the country. I'll bet California and New York would make those numbers look like a rounding error.

**F** **FairElectionAdvocate** → High Desert —

2 years ago

The mistake that they made was to take it too far. So far that is obvious to most people. The trolls on here routinely brag about how they stole the election. Even the other side knows it was rigged. Now the secret is out and reform is inevitable.

Exactly right. Here is a quote from a few years ago "The California Department of Motor Vehicles admitted Monday a mistake caused as many as 1,500 noncitizens being registered to vote in the state." The reason is that the DMV allows illegals to have Driver Licenses. And the DMV will automatically register you to vote if you check a box on the form. The automatic voter law went into effect AFTER Trump was elected and resulted in more than 100 thousand errors that were caught in the first year. So they roll out the fraud in a blue state where they are pretty safe from prosecution and then implement it in red states.

The digital stolen elections have been talked about in DC for a while. McCain and Graham were the beneficiaries of this for their senate races and both were well aware of it. Consider it paid opposition. It wasn't called Scorecard at the time. I can't find the name they used back then in my notes at the moment.

This shows how many illegals are living in this country using fake SS#s.

The "11 million" is closer to 25 million.

There are folks that willingly give their SS# and happy to collect the tax refund and charge a bit more to the folks using it every year, while they living somewhere totally outside the current U.S.S.A.

Anyone whose job it is to maintain accurate and legitimate voter rolls should be fired immediately. Including supervisors and the Secretary of State. Of course the S o S should then be off to Gitmo for her trial for treason.

Are they being removed from the voter rolls? If it is a bogus SSN, are they being reported to the AG in AZ to be prosecuted for violation of voting laws, and identity theft?

Lets get real here, this would be a massive number of crimes if what is being reported is true. And on the other side of the coin, if it were strictly elements involved in voter fraud and none of these "people" existed, it is proof of a well coordinated conspiracy to overthrow our government.

That's what I was thinking. This data could be partial proof in an argument positing voter fraud.

5 0 Reply • Share >

**dude911** → Emron McCabe  
2 years ago

Not even partial. The numbers they are showing us would be all they needed if it were implemented in all 50 states to jack slow Joe to 81 mn votes.

I don't get it still.... Is this an action to cover up something before they show the audit results? Is this a way to legitimize something that was already illegally done? What does this do or not

The story didn't tell us who has authority in Arizona to perform these SSN checks. How many government offices can do this? Could the AZ senate perform this check without requesting permission?

You'd think they would have done this soon after the election. Not wait this long. Texas and Georgia had the same thing done with their voter rolls.

Sounds like someone Arizona has a lot of work cleaning up the mess that was made to make sure all legal votes are counted. I am willing to bet those votes not found all went to sleepy Joe to give him the state of Arizona.

I'm starting to see Leftist Trolls on here trying to discredit the AZ State Legislature and their forensic audit team (Cyber Ninjas). One funny way they're doing it is to appeal to "audits" already conducted by Maricopa County, which is like a suspect on trial arguing before the judge that he conducted his own investigation and found himself innocent! These Leftists are clearly getting desperate in their attempts to discredit before the findings are released.

Where's the F'ing results? We've been promised them for months now. I don't want

next week. They need to present the evidence NOW.

FACT - In 2016 2.4M total votes were cast.

FACT - In 2020 3.5M total votes were cast.

AZ didn't get 900K more voters in just 4 years. FRAUD OCCURRED!

2008– cheated

2012 --cheated

2016– didn't cheat enough

2020– cheated too much and got busted

Biden or Obama,never won anything
